BIO

Jason David Newton is a 33-year-old mechanical technician, Christian dad, and writer from Moses Lake, Washington. Born and raised in small-town Central Washington, Jason represents the kind of American story that rarely makes headlines but defines this country's backbone. He graduated from Washington State University with a degree in Business Management and Operations, earned a U.S. Coast Guard Merchant Mariner Credential after three years as a Second Assistant Engineer in the Bering Sea, and has spent 10+ years in industrial maintenance and operations leadership. In January 2024, Jason came to faith in Jesus Christ. That turning point became the foundation for jasondavidnewton.com, where he writes about Christian fatherhood, blue-collar work, single parenting, and small-town America — without filters and without pretending any of it is easy.

"I'm a regular guy living the American dream in a small town. Public school, state college, blue-collar job, raising a kid, figuring it out as I go. That's my story and I think a lot of people can relate to it."

— Jason David Newton

"Small towns and rural America don't get the credit they deserve. We're not behind — we're the backbone of this country."

— Jason David Newton
